PROFESSIONAL SUMMARY

AI/ML & Data Analytics Specialist (B.Tech CSE – AI & ML, 2027) bridging machine learning, LLMs, and business intelligence, with prior fintech internship experience across Python, SQL, and Power BI. Proven ability to turn complex datasets (100K+ rows) into automated reporting pipelines, predictive risk models, and production-deployed web applications. Seeking an AI/ML or Data Analytics internship to engineer scalable data solutions and drive high-stakes business decisions.

TECHNICAL SKILLS

• Querying & Analysis: SQL (MySQL, PostgreSQL: CTEs, Window Functions, Joins), Python (Pandas, NumPy), Advanced Excel (Power Query, DAX, Pivot Tables), ETL Pipelines

• BI & Visualization: Power BI (Data Modeling, DAX Measures), Microsoft Fabric, Streamlit, Plotly, Interactive KPI Dashboards, Matplotlib, Seaborn

• Machine Learning & AI: Scikit-learn, XGBoost, Meta Prophet, Monte Carlo Simulation, LLMs & RAG (Gemini AI), FastF1, Anomaly Detection (Isolation Forest, PCA), Git

PROFESSIONAL EXPERIENCE

Data Analyst Intern | Bluestock Fintech / Uptricks Services Pvt. Ltd. (Pune / Remote) **May 2026 – Nov 2026**

- Analyzed multi-asset portfolio data using Python and SQL (Sharpe ratio, drawdown, volatility risk metrics); automated ETL pipelines and developed interactive Power BI KPI dashboards for fund performance.

Data Analytics Summer Intern | Recimotech Solutions (Srinagar, J&K) **Jun 2026 – Aug 2026**

- Handled end-to-end ETL workflows, data cleaning, and relational SQL queries to engineer operational BI visualization dashboards, cutting reporting cycle time.

TECHNICAL PROJECTS

DataMind AI – Intelligent CSV/Excel Analytics Assistant | Python, Pandas, Plotly, Streamlit, LLMs | **[Live Demo]**

- Built an AI-driven tool converting natural language queries into verified Pandas code, interactive Plotly charts, and automated summaries.

MFAnalytica – Mutual Fund Analytics Platform | Python, Meta Prophet, Monte Carlo, Gemini AI | **[Live Demo]**

- Developed an intelligent fund platform featuring Meta Prophet time-series forecasting, 2,000-path Monte Carlo risk simulations, and a RAG-based Gemini AI assistant for automated portfolio recommendations.

Nifty100 Financial Intelligence Platform | Python, Pandas, Streamlit, FastAPI, ML | **[Live Demo]**

- Engineered an automated stock intelligence engine for 90+ Nifty 100 tickers using Isolation Forest, 3D-PCA anomaly detection, and Monte Carlo risk valuation.

Customer Churn Prediction & Retention Analytics | SQL, Python, XGBoost, Streamlit, Power BI | **[Live Demo]**

- Identified churn risk across 7,000+ customers using an XGBoost classifier; deployed a live risk-tracking dashboard to protect vulnerable ARR.

Bengaluru Ola Ride Operations Analytics | SQL, Python, Power BI, XGBoost | **[Live Demo]**

- Analyzed 100K+ trip records to uncover peak-hour cancellation bottlenecks; built an operational Power BI dashboard and ML cancellation forecast.

Hospital Readmission Analysis System | Python, Pandas, Seaborn, Streamlit | **[Live Demo]**

- Modeled clinical indicators across 15,000+ patient records to isolate key readmission drivers and deployed an interactive risk screening tool.

Sahaara AI – Empathetic Emotional Wellness Companion | Python, Gemini API, Streamlit, NLP, gTTS | **[Live Demo]**

- Developed an empathetic AI wellness companion featuring voice messaging, multilingual NLP, sentiment tracking, and safety guardrails.

GyaanBuddy – Multimodal AI STEM Learning Platform | Python, Gemini Vision, Streamlit, Pytest | **[Live Demo]**

- Built an interactive bilingual tutor with Snap & Solve multimodal vision problem solving, 7 interactive STEM labs, and parent analytics.

F1 Strategy & Telemetry Analytics Dashboard | Python, Plotly, FastF1, Streamlit | **[Live Demo]**

- Visualized micro-sector speed telemetry, tyre degradation dynamics, and circuit grip evolution across Grand Prix sessions.

FarmSight – Crop Price & Weather Correlation Analysis | Python, Streamlit, Excel, Power BI | **[Live Demo]**

- Correlated historical mandi crop spot prices with precipitation patterns to model price elasticity and seasonality trends.

EDUCATION

B.Tech in Computer Science & Engineering (AI & ML) — GNA University, Punjab **2023 – 2027**

Relevant Coursework: Data Warehousing & Data Mining, Machine Learning, DBMS (SQL), Data Analytics, Data Structures & Algorithms, Statistics & Probability

CERTIFICATIONS & TRAINING

- • **Microsoft Learn:** Introduction to End-to-End Analytics using Microsoft Fabric | Clean, Transform & Load Data in Power BI | Get Data with Power BI
- • **Enterprise Simulations (Forage):** Deloitte Data Analytics | Tata GenAI-Powered Data Analytics
- • **Technical & AI Credentials:** Govt. of India / NSDC Skill India Computer Vision (2026) | Be10x AI Tools & ChatGPT (2026) | Python for Data Science
